VI. Notes

1. The EASA approved Airworthiness Limitations Section of the Instructions for Continued Airworthiness is published in the applicable "Operation, Installation and Maintenance Manual" document, chapter 10.0 "Airworthiness Limitations Section". This ALS section is empty because no life limit is necessary for these models.

2. The overhaul intervals recommended by the manufacturer are listed in MT-Propeller Service Bulletin No. 1.

3. Some models of this propeller can incorporate a start pitch lock which may prevent propeller feathering below a given propeller speed.

4. In accordance with JAR-P 10(c), the MTV-27-2-( )-C-F-R(P)/( )265-417 propeller has received a Preliminary Approval under reference P-EASA.P.C.01007. The full compliance of this propeller has yet to be demonstrated with JAR-P 60(b), JAR-P 160(b), JAR-P 190, and JAR-P 220. The MTV-27-2 propeller model is defined by a main assembly drawing and associated parts list:
   MTV-27-2-(*1)-C-F-R(P) "Constant Speed, Feather, Reverse (System Pratt & Whitney)"
   Drawing No. P-955-A dated 15 February 2006 (*2)
   Parts List No. S-164-A dated 16 February 2006 (*2)

Note:
   (*1) Three versions of hub flanges are available:
   - E = ARP 880
   - N = BCD 5.125 in, twelve 9/16”-18 UNF studs, two dowels
   - H = Similar to N except for dowel location

   (*2) Or later approved revision. Following a revision, the Drawing No. or the Parts List No. includes the corresponding revision letter, e.g. from P-955-A in P-955-B.
