III. Technical Characteristics

1. Type Design Definition

The MTV-34 series propeller models are defined by a main assembly drawing and an associated parts list:

Model MTV-34-1-(*) “Ground Adjustable or Constant Speed”
Drawing No. P-1270-C dated 19 April 2012 (*2)
Parts List No. S-194-C dated 18 January 2013 (*2)

Note:

(*) One version of hub flange is available:
-A = 6x 7/16”-20UNF on a 80mm bolt circle diameter

(*2) Or later approved revision. Following a revision, the Drawing No. or the Parts List No. includes the corresponding revision letter, e.g. from P-1270-C in P-1270-D.
2. **Description**

3-blade ground-adjustable or variable pitch propeller with a hydraulically operated blade pitch change mechanism providing the operation mode “Constant Speed”. The hub is milled out of aluminum alloy. The blades have a laminated wood structure with a composite fiber cover. The leading edge of the blade is protected by a stainless steel erosion protection sheath. Optional equipment includes the spinner.

3. **Equipment**

   Spinner: according to MT-Propeller Service Bulletin No. 13
   Governor: according to MT-Propeller Service Bulletin No. 14

4. **Dimensions**

   Propeller diameter: 150 cm to 178 cm

5. **Weight**

   Maximum: approx. 9.5 kg

6. **Hub/Blade-Combinations**

7. **Control System**

8. **Adaptation to Engine**

   Hub flanges as identified by a letter-code in the propeller designation (refer to note VI.4.)

9. **Direction of Rotation**

   Direction of rotation (viewed in flight direction) as identified by a letter-code in the propeller designation (refer to note VI.4.)
IV. Operational Limits

1. Approved Installations:

   This propeller is certified for installation on Powered Sailplanes, Very Light Aeroplanes and aircraft which can accept a propeller certified according to CS-22 Subpart J. Acceptable propeller/engine/aircraft combinations and the corresponding limitations are listed in MT-Propeller Service Bulletin No. 16. (see also note VI.3.)

## VI. Notes

1. The EASA approved Airworthiness Limitations Section (ALS) of the Instructions for Continued Airworthiness is published in the applicable "Operation, Installation and Maintenance Manual" document, chapter 10.0 "Airworthiness Limitations Section". This ALS section is empty because no life limit is necessary for these models.

2. The overhaul intervals recommended by the manufacturer are published in MT-Propeller Service Bulletin No. 1.

3. This propeller is certified for installation on Powered Sailplanes, Very Light Aeroplanes and aircraft which can accept a propeller certified according to CS-22 Subpart J. The suitability of a propeller for a given aircraft/engine combination must be demonstrated within the scope of the type certification of the aircraft.
